A LITTLE KNITTING LESSON

ARE YOU A TRUE BEGINNER OR STARTING AGAIN?

It doesn't really matter. Luckily, knitting can be learned quickly and even after a long break it's easy to get going again. The basics on the next few pages – explained step by step – should be kept close at hand. You can refer to them again and again. One thing has changed over time – you won't want to give all your hand-knit jumpers, scarves, and hats away anymore. They are just too cool! You'll want to wear them yourself! Have fun with your first/next stitches!

A QUAIL EGG FOR
REFERENCE.

HOW TO READ THE SYMBOLS IN THE KNITTING CHARTS

Selvege stitch

1 Knit stitch

1 Purl stitch

1 Yarn over

Knit 1 through back loop

Purl 1 through back loop

Knit 2 together

Purl 2 together

Knit 3 together

Purl 3 together

Decrease 2 stitches with a slipped decrease: Slip 2 stitches knitwise, knit the next stitch, and pass the 2 slipped stitches over the knit stitch.

Decrease 2 stitches with a slipped decrease: Slip 1 stitch knitwise, then knit the next 2 stitches together, and pass the slipped stitch over.

Decrease 1 stitch with a slipped decrease: Slip 1 stitch knitwise, then knit the next stitch, and pass the slipped stitch over.

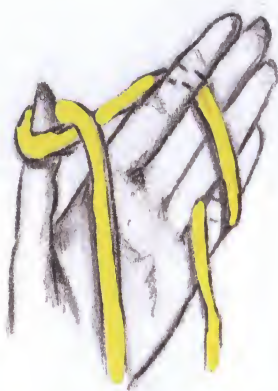

Make 1: Pick up yarn between 2 stitches and knit 1 through back loop.

CASTING ON

1

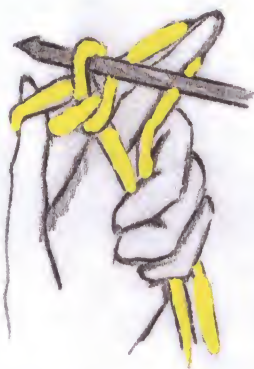

Lay the yarn under the index finger then around thumb of your left hand. The yarn across the index finger comes from the ball and the loop around the thumb is the yarn end.

2

With your right hand run the needle through the loop around the thumb, from below, catch the yarn on the index finger, and draw it down.

3

Draw the yarn from the index finger through the loop around the thumb and tug the yarn end tight.

4

The first cast-on stitch is now on the needle. Please note: If you knit very tightly, use two needles for casting on. The technique stays the same.

5

Again, lay the yarn end around the thumb and the ball end across the index finger. Run the needle through the loop around the thumb, from below.

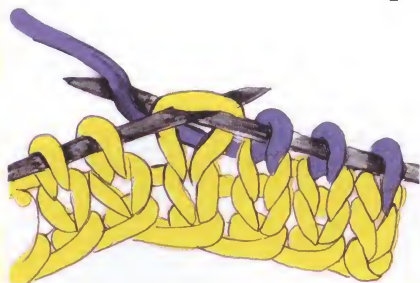

6

Draw the yarn from the index finger through the loop around your thumb. Slip the thumb out of the loop and tug the yarn end tight. Continue in this manner until the desired number of stitches have been cast on.

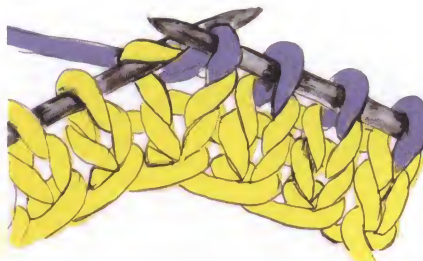

KNIT

1

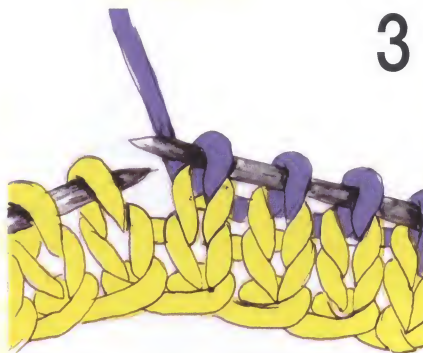

The yarn is behind the left needle. Insert the right needle from below into the next stitch on the left needle.

2

With the right needle, draw the yarn through the stitch and let the stitch slide off the left needle.

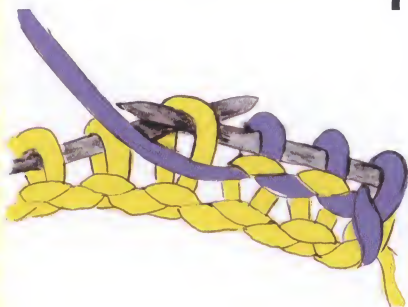

3

One new stitch has been knitted and is on the right needle.

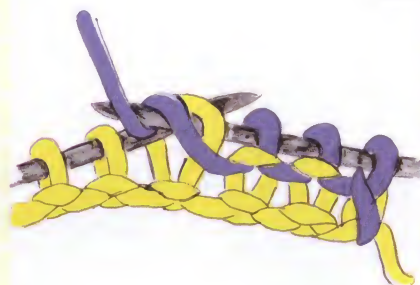

PURL

1

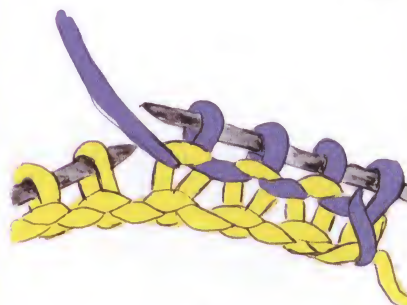

The yarn is in front of the right needle. Insert the right needle from behind into the next stitch on the left needle.

2

Draw the yarn through the stitch, from front to back and let the stitch slide off the left needle.

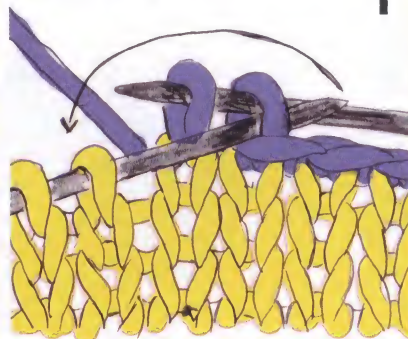

3

One new stitch has been purled and is on the right needle.

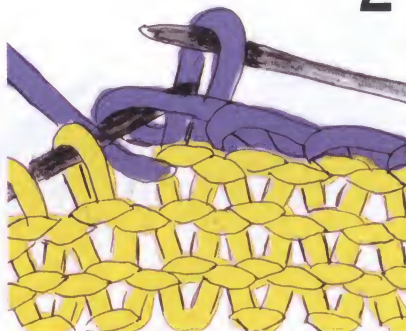

CASTING OFF

1

Casting off knit stitches: Knit together the selvedge stitch and the following stitch. Knit the next stitch, then pass the 1st stitch over the 2nd stitch. Repeat until all stitches have been cast off.

2

Casting off purl stitches: Purl the selvedge stitch and purl the following stitch. Pass the 1st stitch over the 2nd stitch. Purl the next stitch and repeat until all stitches have been cast off.

3

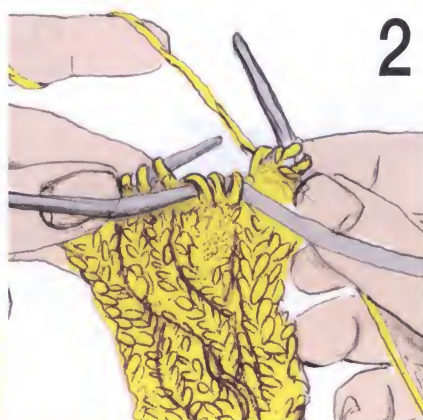

English casting off: Knit the first 2 stitches together. Leave the resulting stitch on the left needle. Throughout the entire row, knit two stitches together in this manner.

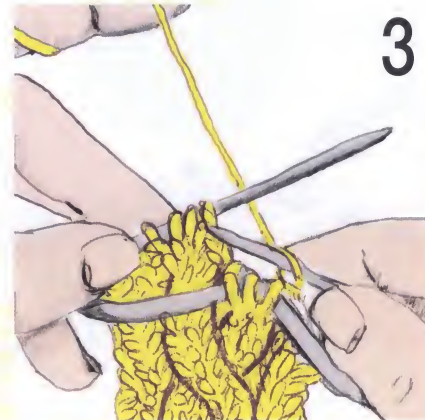

CABLE PATTERN 1

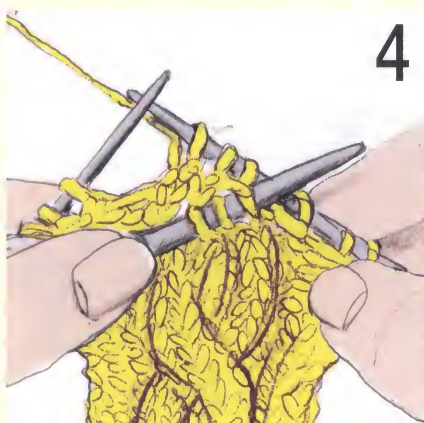

In the 8th row cross 6 stitches to left: Work 7 rows. In right side rows, purl 2, knit 6, purl 2. In the wrong side rows, work all stitches as they appear.

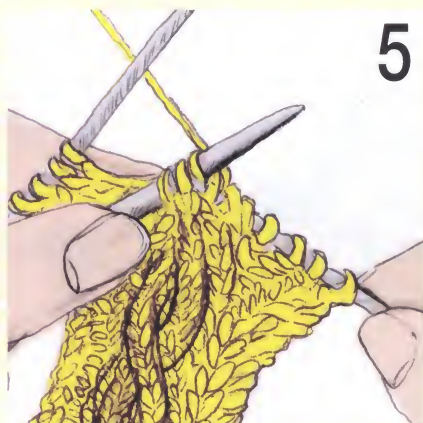

In the 8th row purl 2, slip the next 3 knit stitches onto a cable needle or spare needle and hold them in front of the work.

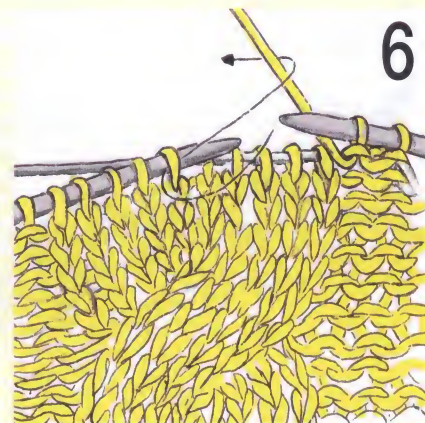

Knit the next 3 knit stitches from the left needle.

This illustration shows the 3 knit stitches, which are now on the right needle.

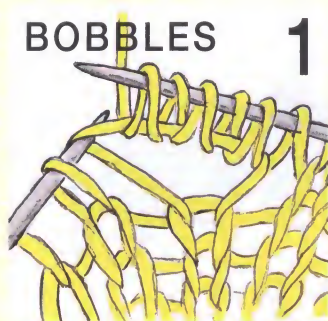

Knit stitch the 3 stitches from the cable/spare needle, then purl 2 stitches.

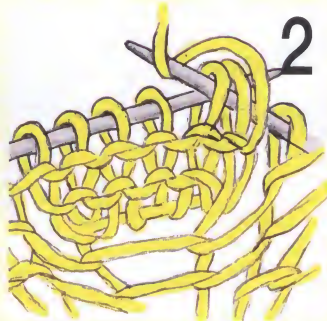

Cross 10 stitches to right: Slide 5 stitches onto a cable/spare needle and hold behind work. Knit 5 stitches then knit the stitches from the cable/spare needle.

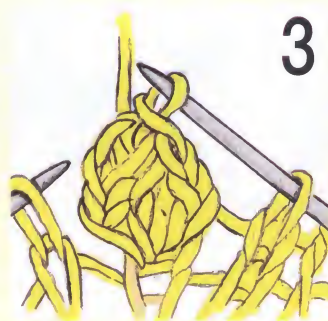

BOBBLES 1

Knit 1 in 1 stitch and leave the stitch on the left needle, make 1 yarn over, and again knit 1 stitch in the stitch on the left needle. Repeat once more from yarn over.

5 new stitches have been created from 1 stitch. Turn the work. On the back purl all newly created stitches. Turn the work again and, on the front, knit the 5 stitches.

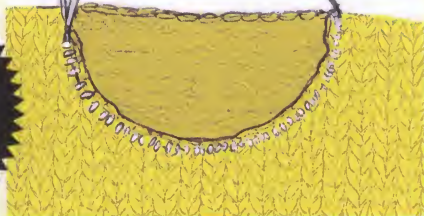

Repeat step 2 once more and end with a wrong side row. Now all stitches must be gathered together to 1 stitch. To do this, knit all 5 stitches together or knit them together, through the back loop.

Now continue with stockinette stitch. Bobbles may be worked individually or in horizontal or vertical rows. They may also be worked in a contrasting colour.

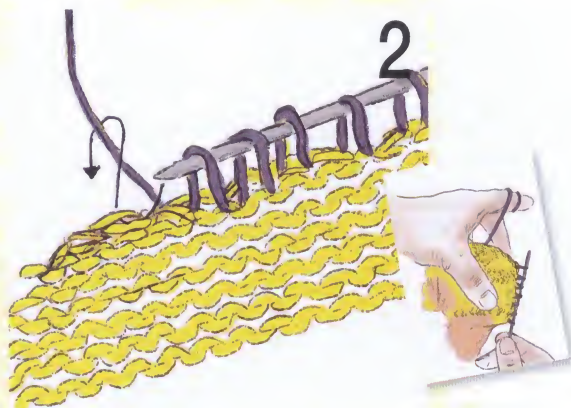

COLLAR

1

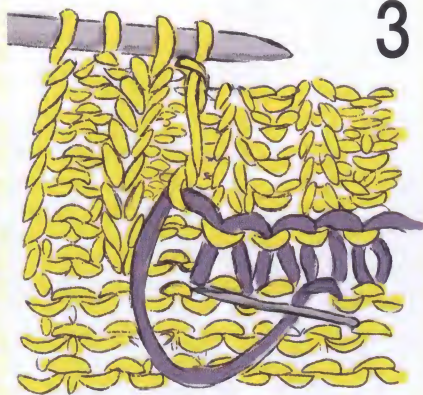

If you want to knit a collar or a band directly onto the neck edge of your garment, use a circular needle to pick up stitches along the neck edge. For each stitch pick up one loop.

2

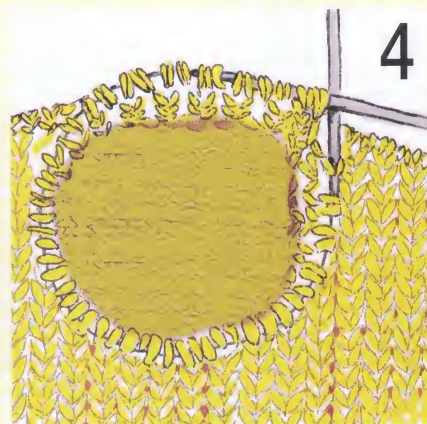

Or: Use a crochet hook to first crochet a row of slip stitches and then use a circular needle to draw one loop through each slip stitch.

3

Or: Sew a doubled band to the neck edge with an invisible seam. If the band is to be folded to the outer side, knit it onto the inner side of the neck edge and then sew the stitches in place below the first row or round.

4

Or: If you don't want pick up stitches, do not cast off the stitches on the neck edge and place them on a short circular needle. When continuing, make one yarn over after each turn. Also do this on the back piece. Then place all stitches on one needle and purl the first round through the back loops.

WHERE IS OUR YARN FROM ?

FROM ALPACA TO YAK, from the Andes to Mongolia – all you need to know about fiber sources, worldwide, so that you know what's on your needle.

Lamas are at home on the high plateaus of the Andes and were already farmed by the Incas. They are shorn every two years and their wool is used to make coats and light blankets.

Vikuña Vikuña fibers are amongst the finest in the world and their production is elaborate. This **camel of the Andes** has not been domesticated. It is captured for shearing and subsequently released.

Silk is made from the cocoons of the silk worm. The world's largest producer is **China**. Thanks to new production methods, it's now possible to harvest the silk without killing the caterpillars.

Linen is made from flax. Its main producer is currently **France**, followed by **Belorussia**. Flax-fibres can be highly spun. They are non-pilling and naturally dirt-repellent.

Cotton The US Cotton Belt with Georgia, Tennessee, Alabama and Mississippi first springs to mind when thinking about cotton. However, **China** actually produces twice as much of this most-used natural fiber, followed closely by **India**. Cotton is lightweight and skin-friendly. The demand for cotton is rising steadily.

Alpaca Their thick fur protects them from the cold of the **Andes** so their wool is much warmer than sheep's wool. In Europe, alpacas, like lamas, are kept and bred as pets.

Cashmere goat

Originating in the Cashmere region of South Asia, today the cashmere goat is bred mainly in **China, Mongolia, and Afghanistan**. Only their fine fleece hair is used to make yarn for pullovers, jackets, and accessories.

Yak There are more than 14 million domesticated yaks worldwide, most of them in the highlands of **Tibet**. However, wild yaks are facing extinction. Their wool is warmer than merino wool and is often mistaken for cashmere, thanks to the soft texture.

Bactrian camel The two-humped camel is bred in Mongolia, China and Russia. Its wool is used to make coats, jackets and blankets. Because the animals shed their fur in the spring, they do not need to be sheared.

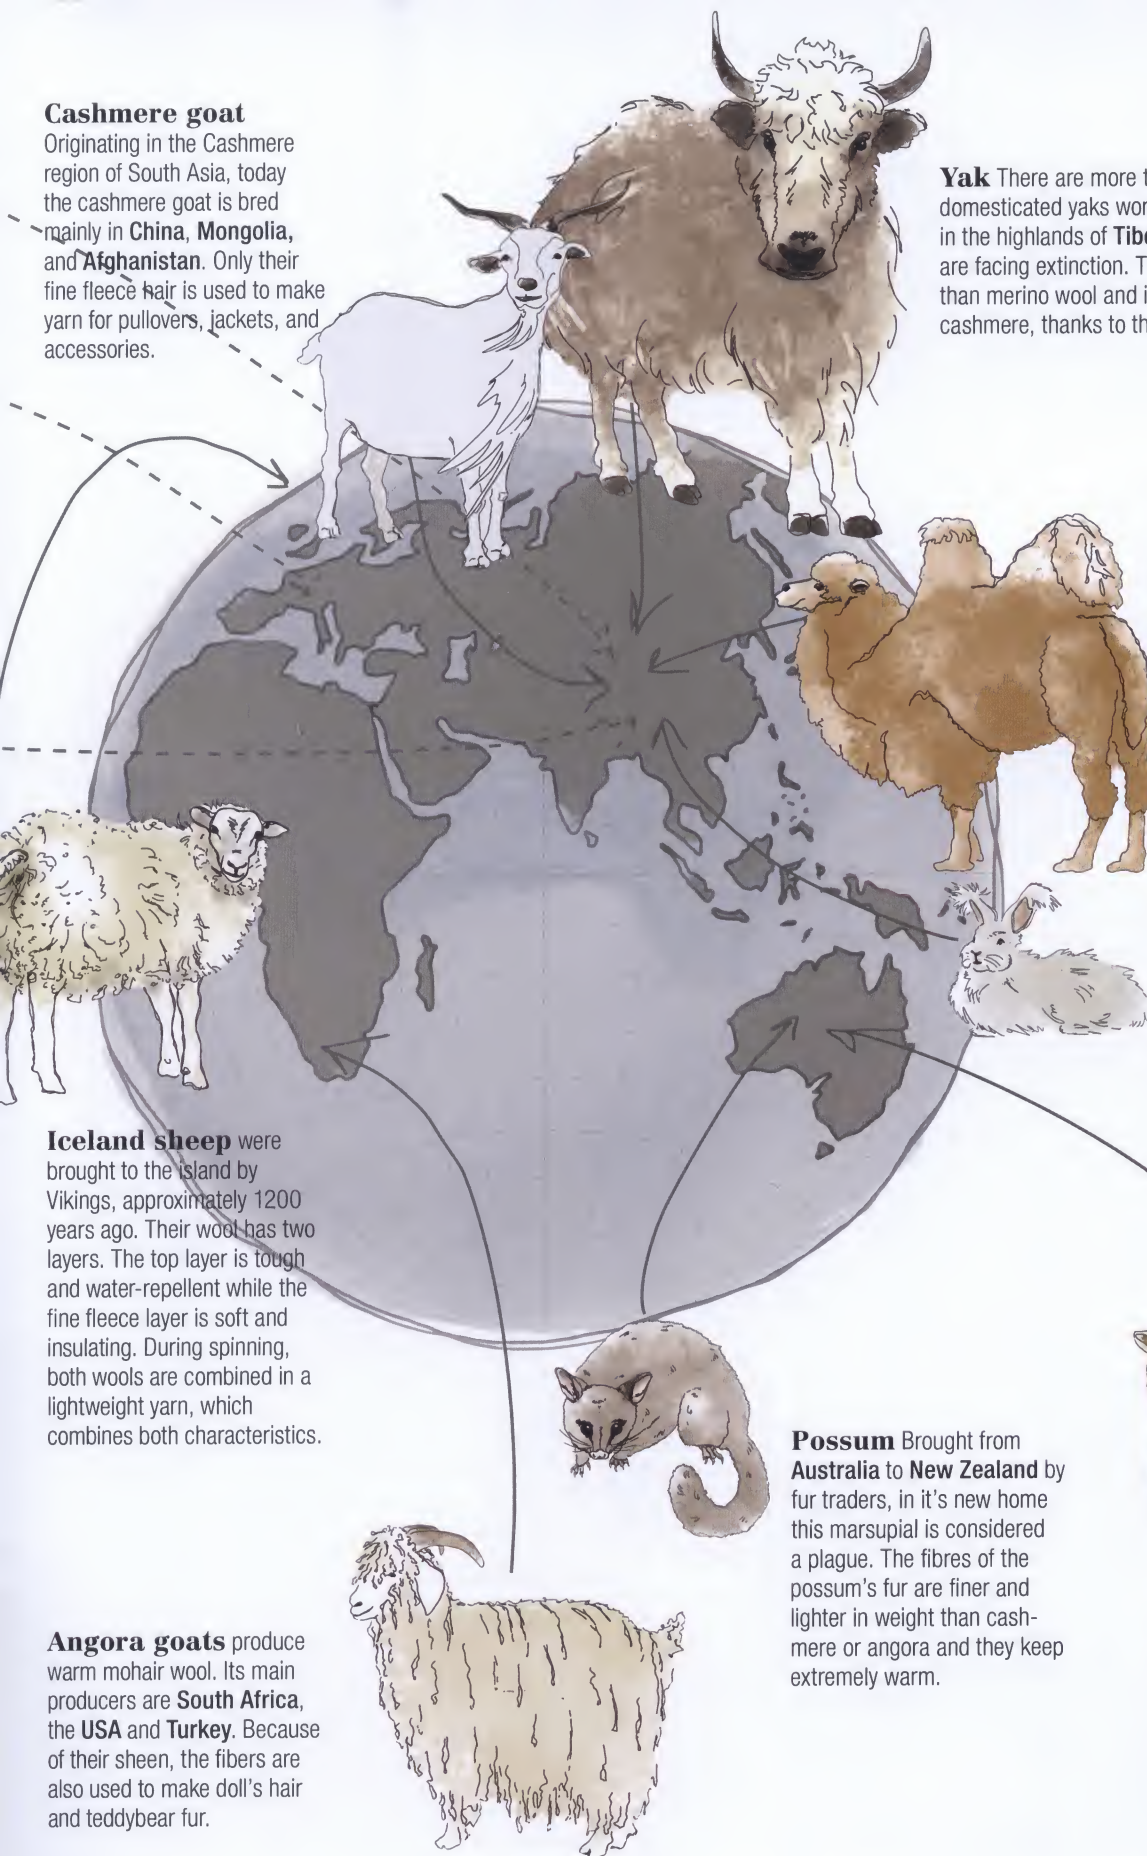

Angora rabbit The bulk of this wool originates in **China**. The fibres of some breeds can be "plucked" but others must be shorn. Because of a video, published by Peta, showing the abuse of these rabbits, H&M and C&A stopped using this wool in their productions.

Iceland sheep were brought to the island by Vikings, approximately 1200 years ago. Their wool has two layers. The top layer is tough and water-repellent while the fine fleece layer is soft and insulating. During spinning, both wools are combined in a lightweight yarn, which combines both characteristics.

Possum Brought from **Australia to New Zealand** by fur traders, in its new home this marsupial is considered a plague. The fibres of the possum's fur are finer and lighter in weight than cashmere or angora and they keep extremely warm.

Angora goats produce warm mohair wool. Its main producers are **South Africa, the USA and Turkey**. Because of their sheen, the fibers are also used to make doll's hair and teddybear fur.

Merino sheep Australia is the undisputed market leader, annually producing 345,000 tons of wool. Some producers have joined New Zealand's ZQ seal of approval, guaranteeing appropriate animal welfare.

KNIT CHIC

Oriental embroidery, street-style grunge, cashmere dreams – on the catwalks, knit is celebrating one success after the other. These are the stars...

ANDREA KARG'S CAREER STARTED IN 1993 IN MUNICH WITH ONE CASHMERE PULLOVER, TIGHT FITTING, V-NECK, IN 15 DIFFERENT COLOURS. SIMPLY GOOD.

allude “Our classics contain so much high-fashion that they do not appear boring, and our high-fashions are so classic, that they are wearable,” says Andrea Karg, Creative Director and Designer, about the philosophy of ALLUDE, the first pure cashmere label, which was accepted in the Paris show calendar. “Partly made from raw cashmere, partly hand-sewn with irregular surfaces, with fringes and hand-embroidered elements – I have created unique pieces, which still follow a distinct line of philosophy and thus belong together,” says Andrea Karg about her current collection. Her outfits have a bit of hippie and a bit of the bohemian, which stands in cool contrast to her precious basic material. A look with passion and elegance. **allude-cashmere.com**

**RAHUL MISHRA
PROUDLY PRESENTS
THE COVETED "INTER-
NATIONAL WOOLMARK
PRIZE 2014", RECEIVED
FOR HIS WONDERFUL
KNIT DESIGNS**

rahul mishra The life and work motto of this Indian fashion designer is – of course – a Gandhi quote: "Remember the face of the poorest you have ever seen and ask yourself if your work makes a difference to them." I live accordingly," says Rahul Mishra. "You have to give as much as you can." Mishra was the first Indian knit designer to cause a stir on the European fashion scene. For his first award-winning collection he used embroidered lotus flower and star motives, not only creating work for his home country's embroiders but also introducing them to new techniques. The elaborate embellishments on his cream-coloured creations are not made from silk but from merino wool. rahulmishra.in

**LEYLA PIEDAYESH,

DEBUT COLLECTION
AT THE BERLIN
FASHION FAIR
"PREMIUM" IN 2004**

lala berlin Finest materials such as cashmere, angora, alpaca, and merino. Street-style inspired graffiti and cartoon patterns. Material mixes with knit and leather: Leyla Piedayesh's designs combine urban casualness and sleek chic to create unbelievably cool outfits. The use of modern print motives in a jacquard structure is an ironic – and successful – interpretation of the oriental rug theme. In addition, she offers bulky hand-knits which create powerful 3-D effects through the use of various yarn. Leyla Piedayesh is calling her Autumn/Winter collection "Go wild and create beauty". Punk meets oriental grunge on a cold day in Berlin – a look that the knitting world would never have dreamed of before. lalaberlin.com

OPULENT & UNIQUE:
CLAUDY JONGSTRA'S
NATURAL COLOURS
ARE A SENSUAL
SENSATION

WOOL FRENZY

Natural colours, such as those used by Rembrandt; cool, luxurious design made from cast-offs; wool sculptures as a political statement; crowned parrots – it's unbelievable how much art there is in wool!

claudy jongstra

„When I extract the colours from the plants I have to ask myself what I want to gain from this plant and what it is willing to give me.“ That sounds like touching eco-kitsch, but for the Dutch artist, Claudy Jongstra, it is a lived commitment to a holistic concept, which sustainably combines art and nature. On her farm in Friesland, in the country's north, she cultivates the same plants as those from which Rembrandt created his paints. The plants in turn are pollinated by a breed of bees which was nearly extinct. Of course, the wool stems from her own sheep because she "wants to feel the warmth of the wool just after shearing." The Drenthe Heath sheep is one of the most endangered domesticated animals.

Claudy Jongstra began her career as a fashion designer but soon she found the fast pace and short-lived nature of the business exasperating. "Some things need time to turn out well, and I wanted to take that time." This is especially true of making dye. "There is this one moment when you have to take the leaves and roots from the pot and then the colour will be unique." Unique, like the intoxicating colour gradations on felt which Claudy Jongstra then creates. These worlds of (natural) colour cover entire walls – like the one in the Fries Museum in Leeuwarden. "People concentrate on their careers but often lose track of their connection to nature in the process. With new awareness, they are often surprised to find that culture comes from nature." This philosophy puts her at the forefront of designers who are concerned with man and nature. Together with Ólafur Eliasson and Kandinsky, her work can be seen in the exhibit, "Rudolf Steiner, Alchemy of the Everyday" in the Kusthal Rotterdam (kunsthal.nl, through January 11th, 2015). claudyjongstra.com

FROM LEFT TO RIGHT: THE TERM "HOLISTIC" IS NO EMPTY PHRASE FOR ARTIST CLAUDY JONGSTRA. ON HER FARM IN FRIESLAND, IN NORTHERN HOLLAND, SHE CREATES A SEAMLESS WORK FLOW FROM RAW MATERIAL TO WORK OF ART. HER SHEEP AND GARDEN SUPPLY WOOL AND DYE. EVEN AFTER 20 YEARS, THE MOMENT OF ACHIEVING THE PERFECT COLOUR IS STILL MAGICAL FOR CLAUDY JONGSTRA. AT THE END OF THE PROCESS, SHE HAS COMBINED COLOUR AND WOOL IN A TAPESTRY, SUCH AS THE "SHORE LINE".

KNIT DESIGNER KATIE JONES FUSES TRADITIONAL CRAFT WITH MODERN IDEAS OF SUSTAINABILITY. SHE ASSEMBLES CAST OFF "BRITISH MADE" MATERIALS TO CREATE LUXURIOUS DESIGNER PIECES.

katie jones worked for design greats, such as John Galiano and Diane von Furstenberg before she presented her first own collection this year. "Upcycling" is her main theme, inspired by her grandmother's motto to make something special out of nothing. Katie Jones' starting point are rejects, faulty fabrics which were returned to the producer – materials for which there would normally be no more use. She refines these rejects through knitting, to turn them into unique designer pieces (cool East London chic), all of which must carry Katie Jones' "100 percent wearable" seal of approval. Already she has been nominated for awards in the "sustainability in fashion" category.

adrienne sloane

The textile sculptures of the American artist are not easy to digest: "Many of my works are a reaction to what I listen to on the radio every day - war, climate change. It's hard to put into

words. I reshape these things in my mind into three dimensional images, from which my works originates." There is a good reason why Adrienne Sloane has always worked with textile fibres: "I always image a line, which changes into infinite shapes, just like the way textiles naturally wrap our bodies." The transformation of knitting from the context of clothing to classical sculpture is what characterizes the fascinating art of this internationally acclaimed artist. adriennesloane.com

vanessa mooncie This English fashion and textile designer is truly multi-talented. After earning her university degree she designed children's wear and worked as an interior designer. She became famous with her silk screen prints and especially with her crochet work. The irresistible charm of her crochet art lies in the ironic combination of material, function, and work process, as wonderfully exemplified by her crocheted crown – casually and convincingly presented by a parrot, above right. Vanessa Mooncie uses new and vintage yarns with metallic elements. "Franco" the fox owes his existence the same creative principle. A crochet brooch in the shape of a fox's head wasn't inventive enough for the artist – so now Franco casually wears a bowler hat. FOR MODELS 11, 14, 19, 33 DOUBLE-STRANDED LONG TAIL CAST-ON

The double-stranded long tail cast-on results in a very stable, flexible edge. It is worked with a double strand of yarn which must be twice as long as the desired width of the cast-on edge. Lay the single strand which comes from the yarn ball over the little finger and pointer finger of the left hand, as shown in *illus. 1* (see arrow), then around the thumb. Then double the yarn back over the thumb – the yarn end hangs over the thumb. To pick up the beginning loop, run both needles under the thumb loop and draw the yarn which comes from the pointer finger through the loop. Let the loop slip from the thumb and pull the beginning loop tight. Then lay the doubled yarn around the thumb of the left hand, as shown in *illus. 2*, while holding the beginning loop with the right hand. The single yarn which comes from the ball, runs over the pointer finger, to the needle. Draw the 1st stitch through, in the direction of the arrow. Slip the thumb out of the loop and pull the yarn tight. As shown in *illus. 3*, lay the doubled yarn around the thumb and draw the yarn through, in the direction of the arrow. Slip the thumb out of the loop and pull the yarn tight. Now alternate pulling up 1 stitch as shown in *illus. 2* and 1 stitch as shown in *illus. 3* and pull tight. *illus. 4* shows the finished cast-on.
